To whom it may concern,

I am writing this letter as a testimonial to the outstanding work of Dürfeld Log and Timber. Ric Dürfeld and his team of craftsmen provide an amazing level of service marked by attention to detail and a deep understanding and respect for their craft. Having recently completed a project that pushed the technical limits of log construction, I can wholeheartedly say that the success of the final product would not have been possible without the knowledge brought to the table by Dürfeld Log and Timber.

While our project looked simple on paper, it was anything but that incorporating a complex jack system, tolerances of less than ¼" and tight integration with structural steel members, rafters, and glass window walls. There was no room for error and as builders, we were apprehensive and doubtful logs could be cut and assembled with that precision. We were totally wrong. Dürfeld and his crew completed this complex project to perfection, meeting these tolerances with little to no saw-dust made on site.

In addition to the technical expertise brought to the project by the Dürfeld crew, another important component of their work is the quality and grade of timbers and logs they are able to source. With a lifetime in the business and a deep respect for the forests these products come from, Ric Dürfeld has developed the best sources for his material and the knowledge of how to work with the character that is unique to each individual log.

Ric Dürfeld, his sons Levon and Caius, Phil Harrison (building designer/project coordinator) and crew are true craftsmen and a pleasure to work with. For their quality, service, knowledge and craft I fully endorse Dürfeld Log and Timber and can say without doubt that they will be my first call for any log home project.

Sincerely,

Chris Pineo

Project Manager, Schuchart Dow Inc.
